Subject: Table field name conflict?

It is possible that with U++ (i'm using 2008.1 beta) you can't define a schema where one field in a table cannot be named equal to other field in a different table?

Example schema:

```
TABLE_(T1)
 INT_ (F1)
END_TABLE

TABLE_ (T2)
  TEXT_ (F1)
END_TABLE
```

F1 redefinition error...

Any help ?

Hello,

for the second definition remove the Underscore.

```
TABLE_ (T2)
TEXT (F1)
END_TABLE
```

HTH, Alex

Alex wrote on Mon, 03 March 2008 15:30Hello,

for the second definition remove the Underscore.

TABLE_ (T2)
TEXT (F1)
END_TABLE

HTH, Alex

And for a third definition of F1?!

Well, if we are speaking about SqlExp, yes, but you have to use this form:

F1.Of(T1)
