[View Forum Message](#) <> [Reply to Message](#)

When I set AlignRight in the Designer for an EditString item, the compiler doesn't like it.

Nick

Not enough information. It works for me, although there is a bug that means that you can't use SetFont and tool tips together (.Tip gets added first).

Can you post the relevant portion of the .lay file?

d:\myapps\openwind\Optimiser.h(39) : see reference to function template instantiation 'void
Upp::CtrlLayout<OptimiserProgress>(T &,const char *)' being compiled
with
```

```

[  

    T=OptimiserProgress  

]  

D:\MyApps\OpenWind/Optimiser.lay(11) : error C2228: left of '.SetEditable' must have  

class/struct/union  

D:\MyApps\OpenWind/Optimiser.lay(11) : error C2228: left of '.LeftPosZ' must have  

class/struct/union  

D:\MyApps\OpenWind/Optimiser.lay(11) : error C2228: left of '.TopPosZ' must have  

class/struct/union

```

My layout file for this class is

```

LAYOUT(OptimiserProgressLayout, 780, 156)
ITEM(Label, dv___0, SetLabel(t_("Iterations")).LeftPosZ(12, 96).TopPosZ(32, 19))
ITEM(EditInt, m_nTurbs, WantFocus(false).SetEditable(false).LeftPosZ(116, 56).TopPosZ(8, 19))
ITEM(EditInt, m_nIterations, WantFocus(false).SetEditable(false).LeftPosZ(116, 56).TopPosZ(32,
19))
ITEM>EditString, m_fArrayLoss, WantFocus(false).SetEditable(false).LeftPosZ(116,
56).TopPosZ(128, 19))
ITEM>EditString, m_fCF, WantFocus(false).SetEditable(false).LeftPosZ(116, 56).TopPosZ(104,
19))
ITEM(Option, optionGrossE, SetLabel(t_("Gross Energy")).LeftPosZ(12, 96).TopPosZ(80, 19))
ITEM(Label, optionCF, SetLabel(t_("Capacity Factor")).LeftPosZ(12, 96).TopPosZ(104, 19))
ITEM(Option, optionNetE, SetLabel(t_("Net Energy")).LeftPosZ(12, 96).TopPosZ(56, 20))
ITEM>EditString, m_fGrossE, WantFocus(false).SetEditable(false).LeftPosZ(116,
56).TopPosZ(80, 19))
ITEM>EditString, m_fNetE, WantFocus(false).AlignRight(true).SetEditable(false).LeftPosZ(116,
56).TopPosZ(56, 19))
ITEM(Option, optionArrayLosses, SetLabel(t_("Array Losses")).LeftPosZ(12, 96).TopPosZ(128,
19))
ITEM(OPLabel, opLabel, HSizePosZ(216, 12).VSizePosZ(32, 8))
ITEM(Label, dv___12, SetLabel(t_("Turbines")).LeftPosZ(12, 60).TopPosZ(8, 19))
ITEM(Label, dv___13, SetLabel(t_("MWh/yr")).LeftPosZ(176, 40).TopPosZ(80, 19))
ITEM(Label, dv___14, SetLabel(t_("%")).LeftPosZ(176, 40).TopPosZ(104, 19))
ITEM(Label, dv___15, SetLabel(t_("%")).LeftPosZ(176, 40).TopPosZ(128, 19))
ITEM(Label, dv___16, SetLabel(t_("MWh/yr")).LeftPosZ(176, 40).TopPosZ(56, 19))
END_LAYOUT

```

Any ideas?

Nick

Hi Nick,

I think it should rather be:

ITEM(EditString, m_fNetE, AlignRight(true).WantFocus(false).SetEditable(false).LeftPosZ(116, 56).TopPosZ(56, 19)), since WantFocus() return reference to Ctrl and not to EditField which in turn defines AlignRight().

Fix:

Change CtrlLib/CtrlLib.usc starting line 422 from:

```
Frame SetFrame = InsetFrame();
Font SetFont = StdFont();
bool SetEditable = true @1 ? "Editable";
bool WantFocus = true;
int MaxChars;
bool AlignRight;
Text Tip;to;
bool AlignRight @1;
int MaxChars @2;
Font SetFont = StdFont() @3;
bool SetEditable = true @4 ? "Editable";
Frame SetFrame = InsetFrame() @5;
Text Tip @6;
bool WantFocus = true @7;
```

After that you will have to get the Layout manager to refresh the .lay file. Changing from text/layout should work, but setting then clearing WantFocus for each ctrl will definitely work.

The number after the @ char determines the order that the calls get added to the .lay file. If missing the order they are listed determines the order, but this sometimes seems to go wrong, and most of the Upp ctrls don't have the ordering explicitly stated.

Cool. This seems to be a recurring problem (I think I've seen it mentioned before anyway), and is linked to this line in ide/LayDes/item.cpp:

```
Vector<int> o = GetSortOrder(property, FieldRelation(&ItemProperty::level, StdLess<int>()));  
Presumably the intent here is to leave all properties that haven't had a specific order set (have  
level = 0) in the same relative place in the list. Is it possible that the algorithm used for sorting here  
is moving them?
```

That would explain the problem, but it might be easier/more sensible just to add fixed orders to all the properties anyway.

Thanks. I will wait for the next beta update. for now I just added it explicitly.

Cheers,

Nick
