SVN revision 180.

1) Borland C++ Builder 2007

upp\_ws\_base\_ide\_bcb2007.tar.gz : base + ide (03/05/08)

You will need to apply a patch to the official source code in order to build UPP using these project files.

I do not have access to BCB2007, so, I had no chance to check these project files myself.

### File Attachments

Hm, I do not understand Who has checked them then?

Mirek

They are auto-generated and looking OK, although I didn't check them.  
Looking for volunteers

B.T.W., could you please apply a patch needed to build UPP from project files?

TIA
