SVN revision 180.

1) Borland C++ Builder 2007

```
upp ws base ide bcb2007.tar.gz: base + ide (03/05/08)
```

You will need to apply a patch to the official source code in order to build UPP using these project files.

I do not have access to BCB2007, so, I had no chance to check these project files myself.

File Attachments

```
1) upp ws base ide bcb2007.tar.gz, downloaded 305 times
```

Mirek

They are auto-generated	and looking OK,	although I didr	n't check them.
Looking for volunteers			

B.T.W., could you please apply a patch needed to build UPP from project files?

TIA
