Hi,

I'm new to Ultimate++ and C++.

I printed 'Getting started with TheIDE' topic from help and I started to do step by step as the document writes.

But in the 3.1 - Main package configuration I can't select 'CONSOLE' or 'GUI', because the form is empty.

What's wrong? I tried it with the newest beta version and 712-dev1 version.

I've attached a screenshot. Please help me.

Everything looks alright. That dialog is not meant to give you a list of options and you have to select one.

Instead it allows you to enter any option. You have to right click and select "Insert", so you get a new line where you can write GUI or CONSOLE. You can specify even custom options if your project would ever need some.

Thanks a lot.  
I passed this step by your help.
