
Subject: SDL sample needs *.dll

Posted by amando1957 **on** Mon, 17 Mar 2008 18:47:40 GMT

[View Forum Message](#) <> [Reply to Message](#)

Hello folks,

I am using U++ 2007.1 at WIN2K. I wanted to try the SDL example from the folder "examples".

First i have ned to correct the path #ifdef PLATFORM_WIN32

#include <SDL.h> to #ifdef PLATFORM_WIN32

#include <C:\upp\sdl\include/SDL.h>. Then it still complained it would not find the
"sdl.dll":Linking...

c++.exe: SDL.dll: No such file or directory

I have found that file on C:/upp/sdl/lib/sdl.dll. I have tried to add this path in "Project / Main Package configuration", but did not succeed. I have also added the packages "Core, Draw, SdlExample".

Obvious i need to tell the path of the *.dll, but don't know where. Can someone give me a pointer?

kind greets

amando

Hi,

go to "Project/Package organizer ...".

In the right sub window right click and go on "New Compipler options ...", leave the first edit field empty and put into second "-IC:\upp\sdl\include".

Do the equivalent operations with library path (this time with new link options).

Then you should be able to use the original version.

Matthias

[View Forum Message](#) <> [Reply to Message](#)

Hello Matthias,

Thanks for your hint. The include is fine now, but still it does not find the SDL.dll. I have tried

different versions of the path, as C:/upp/sdl/lib/sdl.dll

-IC:/upp/sdl/lib/sdl.dll

-LC:/upp/sdl/lib/sdl.dll

(as -L is known from command line)

Apart of the "link options" I have also tried to add it at "libraries", but did not help. The log's return is still the same.

kindly

amando

[View Forum Message](#) <> [Reply to Message](#)

Try with link options and full path (C:/upp/sdl/lib/sdl.dll) and build your application in shared mode.

Command line should look like this:

c++ ... -shared ... "C:/upp/sdl/lib/sdl.dll" ...

You can activate shared build mode in output mode options.

Can you post the resulting verbose linker output?

Matthias

Hello Matthias,

I'm not used to compile at the command line, i'm only using the GUI-IDE. I have done that all you have advised me, but its still the same. I have tried the "use shared libs" and also "all shared", at left and at right. Here is the verbose output:

```
----- plugin\z ( GCC SO SHARED FORCE_SPEED BLITZ WIN32 ) (1 / 5)

This worked for me (no source-code changes):James

My package configuration looks like this:

SDL source path is at the same level as "uppsrc" assembly (that's why I used "../").
Additionally you have to add the following at the end of main.cpp:
#if defined(PLATFORM_WIN32) && defined(COMPILEER_GCC)

```
int APIENTRY WinMain(HINSTANCE hInstance, HINSTANCE, LPSTR lpCmdLine, int nCmdShow){return main(0,NULL);}
#endif
```

See topic [http://www.ultimatepp.org/forum/index.php?t=msg&th=1552& start=0&](http://www.ultimatepp.org/forum/index.php?t=msg&th=1552&start=0&)

This patch should already have been applied to source repo.

And of course, you don't have to link in shared mode since there is an import library for DLL within SDL/lib dir.

Matthias

[View Forum Message](#) <> [Reply to Message](#)

Hello James, Hello Matthias,

Its RUNNING now!!

1

I have added the pathes recommended, got the OK (hmmm...).

RETURN:

Windows-message "SDL-dll not found" at several
pathes, among them "C:/winnt/system32/" (The one entered in "package organizer" not to see at
the MessageBox).

2

I have copied the SDL.dll then to

C:\WINNT\system32

(also for future projects). As it resides there it might go even without the pathes.

RETURN:

runs fine,

It should do a good job to copy my current *.upp, for convenience:

```
description "SDL demo example";
```

```
uses
```

```
Core;
```

```
library(MSC) "SDL SDLmain";
```

```
library(GCC WIN32) "C:/upp/sdl/lib/SDL.dll SDLmain";  
library(LINUX) "SDL SDLmain";  
library(FREEBSD) "SDL SDLmain X11 Xext Xrandr Xrender vga vgl aa usbhid ncurses";  
options(WIN32) -IC:\upp\sdl\include;  
link(GCC WIN32) -LC:/upp/sdl/lib;  
link(MSC) -LIBPATH"C:/upp/sdl/lib";  
  
file  
  main.cpp;  
  
mainconfig  
  "" = "";
```

@Matthias:
have done it with the tips of James already.
Many thanks to all.

kind greets
amando
