http://appcore.home.comcast.net/~appcore/misc/rwmutex_win_hp.p.html

Nice about it is that it seems to be as fast as normal mutex ("CriticalSection") for read path... (note that pthread rwlock read path is about 50% slower than pthread mutex...)

Now if I only understood fully how it works

Mirek

Well, I ask *you* about *your* library, so I suggest you ask *Chris Thomasson* about *his* library
.

I'm sure you've visited:

<http://appcore.home.comcast.net/~appcore/>

and

comp.programming.threads

Werner
