Subject: Small bug in code formatter

I've found a small bug in code formatter that prevented indenting with tabs.
The corrected code in FormatCode.cpp :

```
Formatter.setParensUnPaddingMode(astyle_ParensUnPaddingMode);
 Formatter.setOperatorPaddingMode(astyle_OperatorPaddingMode);
 Formatter.setEmptyLineFill(astyle_EmptyLineFill);
 Formatter.setTabSpaceConversionMode(astyle_TabSpaceConversionMode);
 if(!indent_spaces)
  Formatter.setTabIndentation(editortabsize, true);
 else
  Formatter.setSpaceIndentation(indent_amount);
```

I'll update SVN accordingly.

Ciao

Max
