I just installed windows xp japanese under linux using virtualbox.

Then i installed VS 2008 express.
I tried to compile UWord with mingw, it worked.
But when i tried to compile for MSC9 it didn't work.
It always produce this error, "error C2001: newline in constant".

Thanks

Second environment:
- VS 2005
- VS 2008
- English XP with japanese capable.

Both cannot compile, the same error.
Only work with VS 2003.

Currently developing U++ based project. U++ version - latest downloaded from SVN.
No problems with compiling under MS 2003 (7.1) or MS 2005 (8.0) compilers.

No problems with compiling under MS 2003 (7.1) or MS 2005 (8.0) compilers.

You might want to specify your problem:

What exactly are you doing to compile with VC++ 2008?

Which results do you get?

VC++ 2008 comes with an SDK, called "v6.0A". But you might need another SDK, called "Microsoft Platform SDK for Windows Server 2003 R2" too.
