Hi,

Can add support for pcx image files?

---

Can add support for pcx image files?

Well, you could help a lot in this matter by finding an open-source BSD licensed or compatible PCX library. It should be lightweight (no additional dependencies), feature-complete and bug-free.

PCX is a pretty dead format, so effort to write a new lib for it is not justified IMO, but using an already present lib to allow Image to handle the format would be easy.

I deal perfectly. I know that it is a format in disuse, but some programs continue using it (I want to construct a frontend for one of them).

I will try to find some library.

For the moment, I only have the specification of the file format (and the method of compression):  
<http://www.qzx.com/pc-gpe/pcx.txt>

Thank you for answering rapidly.

Actually, I had to deal with PCX around 1992, I hope I have that code somewhere in archive (together with .img format

I am now out however, please remind me in 2 weeks.

Reminded. (Is this way the correct one?)

OK, after googling a bit, I have found that there exists

"PCX library by Ian Ashdown"

but I am not quite able to find sources....

Maybe you can help? And then, you or somebody can adapt it as U++ plugin package

Mirek

I have found these separate files of Ian Ashdown's PCX library (Version 1.00B):  
[http://ptonthat.club.fr/doc-dev/FORMATS/IMG/PCX.\\_PC/index.php](http://ptonthat.club.fr/doc-dev/FORMATS/IMG/PCX._PC/index.php)

Mirek

Though I would like to be able to help, I am begun to learn on Upp. I have read a bit the code of the implementation of other formats in Upp but it is too much complicated for me. I wait that someone with more knowledge (and with desire of doing it ) could do.

My excuses for not being able to contribute anything.

Well, plugin/pcx added to U++...

I am not sure whether it will work with all possible .pcx files; please try.

Also, only .pcx loading (means PCXRaster) is implemented.

Simply put what is posted here into uppsrc/plugin. Then e.g. add plugin/pcx to examples/ImageView -> it should start displaying .pcx files. If you meet any file .pcx that does not display, report

Enjoy,

Mirek

Thanks!

It works with Upp 2007.1?

Actually, it should, but I would recommend going latest beta or even svn anyway...

I have tested it with some images (1, 8 and 24 BitsPerPixel) and seems to work correctly.  
Tested on Upp 2007.1 (with MinGW) and Upp 2008.1 beta 2 (MinGW version).

Nice, another small issue resolved
