## Subject: CH\_STYLE parsing fix

This has been really annoying me ever since Chameleon was introduced but I was waiting for Mirek to fix it . Thelde parser can't handle macros like:CH\_STYLE(a, b, c) {

... }

and doesn't recover properly, breaking Goto and Query for everything in the file after that point.

It now works much, much better. I've attached the modified Parser.cpp from the CppBase package. Changes are marked JT (there are only 3).

I've also fixed a bug that was causing all items in the goto window to be listed twice when the search field was empty. Goto.cpp is from the ide package.
