U++ now should compile without warnings even if -Wall is active, except "plugin" packages.

Note however that Ubuntu's compiler does not warn for

if(a == b && c == d || e == f);

Mirek

Mirek

Well, that's even more perfect
Btw, maybe enabling --pedantic option it'll warn. I never use it as causes tons of unneeded messages, but....

Max

U++ can benefit from DEPRECATED macro now.
