---

Just starting to use this system in Linux

Mt.h has an  
`#ifdef PLATFORM_POSIX`  
where inside it has inline functions for Enter and Leave

So far so good.

Mt.cpp  
doesn't have  
`#ifdef PLATFORM_WIN32`  
and redefines the functions to be non-inline.

Wow! I just found the `#endif` autocomment feature. THAT IS SWEET!

In anycase insert `#ifdef PLATFORM_WIN32` block inside the `#ifdef #ifdef _MULTITHREADED` block and that bug is gone.
