Here's a hopefully complete 2008.1 translation for Spanish (ES-ES Windows 1252).

File Attachments
1) ES-ES.windows-1252.tr, downloaded 509 times

Ehm, which one of two is correct?

Going to import this one...

I am missing RichEdit translation.

(But to be fair, we had issues with .t system in the past, can be bug of ours, in any case, translation is not there...).

Hi, I assumme this is the file I need if I want the upp messages (like "Delete" in a GridCtrl when a right click mouse is detected) to appear in Spanish.
I tryed to decompress this .tr file on a GNU/Linux distro but I couldn't, could you post it on a zip or tar format so I can decomppress it on GNU/Linux?

I'll also appreciate if you could tell me how do I have to install it

Thanks in advance

I saw an "Import runtime translation file *,tr" option in the Project Menu, so I guess the file is not compressed.
I selected that option and point it to this file, recompile my app but I still get the messages in English, not in Spanish, how should I do It?.

Thanks

Have you set your language? (So that the app knows what language to use - this is not automatically taken from OS).

SetLanguage(LNG('E', 'S', 'E', 'S'));
