Subject: Cursor doesn't refresh

Hello,
I have problem with TreeCtrl with context menu enabled. In my application when I click right mouse button at the TreeCtrl, context menu appears, but when it disappears after clicking outside of it and the cursor line number remains unchanged, the cursor doesn't refresh correctly - only part previously behind the context menu refreshes.
On the line 1132 of TreeCtrl.cpp (2008-1beta2) in TreeCtrl::GotFocus() method there is "RefreshLine(cursor)" that is (as I can see) responsible for refreshing the cursor in situations like the one discussed. Is there any reason for "RefreshLine(cursor)" being in "else" branch of the "if" clause? After I removed the "else" (thus taking "RefreshLine(cursor)" out of the "if" clause) the problem disappeared.

Thank you for your help.
Gabi

Hm, I am not quite sure why there is "else" either...

For now I removed it.

Mirek

OK. To be honest, removing some bug by only removing some portion of the code is in some manner refreshing for me
Thank you.

Gabi
