Hi, function is

```
 Mutex& Get()        { if(!Readsection) Initialize(); return *const_cast<Mutex *>(section); }
```

but Readsection is not known.

should be perhaps

```
 Mutex& Get()        { if(!ReadWithBarrier(section)) Initialize(); return *const_cast<Mutex
*>(section); }
```

Cheers, Hans.

Yes, as I reported.

Currently svn repository seems a little bit out of sync.
Some changes are made, but a windows compile is not possible.

We should wait until next week and enjoy the good weather
