Hi, total newbie here. I'm trying to learn how easy it is to interface to a PostgreSQL database from U++.

I've installed 2008.1Beta2. I'm trying to run the example code for accessing a PostgreSQL database as shown here:

[http://www.ultimatepp.org/reference\\$SQL_PostgreSql.html](http://www.ultimatepp.org/reference$SQL_PostgreSql.html)

But I'm getting this:

----- PostgresExample (MAIN GCC DEBUG DEBUG_FULL BLITZ WIN32)

Postgres.cpp

In file included from C:\Projects\upp\PostgresExample\Postgres.h:13,

from C:\Projects\upp\PostgresExample\Postgres.cpp:1:

C:\upp\uppsrc\PostgreSQL\PostgreSQL.h:8:22: error: libpq-fe.h: No such file or directory

In file included from C:\Projects\upp\PostgresExample\Postgres.h:13,

from C:\Projects\upp\PostgresExample\Postgres.cpp:1:

C:\upp\uppsrc\PostgreSQL\PostgreSQL.h:52: error: ISO C++ forbids declaration of 'PGconn' with no type

C:\upp\uppsrc\PostgreSQL\PostgreSQL.h:52: error: expected ';' before '*' token

C:\upp\uppsrc\PostgreSQL\PostgreSQL.h:53: error: ISO C++ forbids declaration of 'PGresult' with no type

C:\upp\uppsrc\PostgreSQL\PostgreSQL.h:53: error: expected ';' before '*' token

C:\upp\uppsrc\PostgreSQL\PostgreSQL.h:66: error: expected type-specifier before 'PGconn'

C:\upp\uppsrc\PostgreSQL\PostgreSQL.h:75: error: ISO C++ forbids declaration of 'PGconn' with no type

C:\upp\uppsrc\PostgreSQL\PostgreSQL.h:75: error: expected ';' before '*' token

C:\upp\uppsrc\PostgreSQL\PostgreSQL.h:76: error: expected ';' before '}' token

C:\upp\uppsrc\PostgreSQL\PostgreSQL.h: In member function 'virtual bool

Upp::PostgreSQLSession::IsOpen() const

{:

C:\upp\uppsrc\PostgreSQL\PostgreSQL.h:35: error: 'conn' was not declared in this scope

C:\upp\uppsrc\PostgreSQL\PostgreSQL.h: In member function 'Upp::String

Upp::PostgreSQLSession::GetUser()':

C:\upp\uppsrc\PostgreSQL\PostgreSQL.h:65: error: 'conn' was not declared in this scope

C:\upp\uppsrc\PostgreSQL\PostgreSQL.h:65: error: 'PQuser' was not declared in this scope

C:\upp\uppsrc\PostgreSQL\PostgreSQL.h: In constructor

'Upp::PostgreSQLSession::PostgreSQLSession()':

C:\upp\uppsrc\PostgreSQL\PostgreSQL.h:73: error: 'conn' was not declared in this scope

C:\Projects\upp\PostgresExample\Postgres.cpp: In member function 'bool

PostgreSQLTest::OpenDB()':

C:\Projects\upp\PostgresExample\Postgres.cpp:64: error: 'POSTGRESS' was not declared in this scope

PostgresExample: 1 file(s) built in (0:08.18), 8188 msec / file, duration = 8235 msec

There were errors. (0:08.25)

I don't have a libpq-fe.h file and some of the other errors seem to be within the upp sources. Is there a more recent version of this example code or can someone get me pointed in the right direction? Thanks.

Well, you must actually have postgresql installed and add paths to its include and lib directories in Setup/Build methods.

Thanks.

I got Postgres re-installed with headers and libs. So I'm down to this:

Postgres.cpp
C:\projects\upp\PostgresExample\Postgres.cpp: In member function 'bool
PostgreSQLTest::OpenDB()':
C:\projects\upp\PostgresExample\Postgres.cpp:34: error: 'POSTGRESS' was not declared in this
scope

Comes from this line:
SqlSchema sch(POSTGRESS);

I thought it might be a typo so I tried it as POSTGRES with no luck.

What is POSTGRESS and where do I find it?

[View Forum Message](#) <> [Reply to Message](#)

I am sorry, it is a bug in example. It should be PGSQL instead of POSTGRESS.

Thanks. Making progress.

Now this:
Linking...
(option '-O 2' ignored)
Target machine: i386
File 'libpq.a' not found.

Well, guess you have installed a PSQL library for MSVC compiler and trying to use it with MinGW . There is a difference between MinGW and MSVC library files, MSVC use *.lib and MinGW use *.a for extensions. Or maybe you set the wrong folders path, if lib cannot be found. For option '-O 2' it should be -O2, but it doesn't matter here, unless you want optimisation.

Bleah. That's a fine kettle of fish.

I used the Win32 installer from Postgresql.org and I think it's built using MSVC so I suppose that makes sense. And I seem to have no .a files anywhere on my system. Now I guess I'll have to install MSVC. Woe is me.

bytefield wrote on Wed, 07 May 2008 16:45For option '-O 2' it should be -O2, but it doesn't matter here, unless you want optimisation.
I didn't enter that option anywhere. And I don't see it in Setup/Build methods. I should probably enter it as a bug.

I've installed MSVC Express 2005. Now I'm getting this:

C:\upp\uppsrc\Core/Core.h(316) : fatal error C1083: Cannot open include file: 'windef.h': No such file or directory
MenuItem.cpp

Does this mean I need the Platform SDK or Windows SDK?

If so, does anyone know of a download link. I'm on W2k at the moment.

Answered my own question. Finally found a download link at MS that actually worked and got enough of it to have the windef.h file.

Now I'm getting this:

Linking...

LINK : fatal error LNK1104: cannot open file 'ms\libpq.lib'

I have 'libpq.lib' but it's in 'C:\Program Files\PostgreSQL\8.3\lib' where the PG installer put it. There is no 'ms' to be found anywhere in that tree.

Any help?

Interesting, maybe they changed the location of that file...

In Package Organizer change PostgreSQL's library config (remove "ms").

Thanks. Well, I've worked my way up to runtime errors...

SQL_PostgreSql.exe - Ordinal Not Found

The ordinal 284 could not be located in the dynamic link library SSLEAY32.dll.

Google found lots of references to this problem having something relation to SSL connection to PG. But no resolutions.

Note that I have no less than 17 copies of SSLEAY32.dll on my system with almost none of them appearing to be the same version.

Any help appreciated!

Maybe you can try PostgreSQL-8.2.
I'm using it without any problems.

zsolt wrote on Thu, 08 May 2008 16:41 Maybe you can try PostgreSQL-8.2.

I'm using it without any problems.

Thanks. I'm now building it against 8.2 using MSVC2005 and getting this during the link step:

Linking...

Postgres.obj : error LNK2019: unresolved external symbol "public: class Upp::ArrayCtrl::Column & __thiscall U

pp::ArrayCtrl::AddColumn(class Upp::Id,char const *,int)"

(?AddColumn@ArrayCtrl@Upp@@@QAEAAVColumn@12@VId@

2@PBDH@Z) referenced in function "public: __thiscall PostgreSQLTest::PostgreSQLTest(void)"

(?0PostgreSQL

Test@@QAE@XZ)

Postgres.obj : error LNK2001: unresolved external symbol "public: virtual void __thiscall

Upp::Ctrl::NcCreate

(struct HWND__ *)" (?NcCreate@Ctrl@Upp@@@UAEXPAUHWND__@@@Z)

Postgres.obj : error LNK2001: unresolved external symbol "public: virtual void __thiscall

Upp::Ctrl::NcDestro

y(void)" (?NcDestroy@Ctrl@Upp@@@UAEXXZ)

There's about 115 messages like that.

Any ideas.

I think, this is a very simple problem, indicating, that you have to add CtrlLib to your main package.
