Rinning theide in release mode (SVN229 - Uvs 2538) on ubuntu hardy gives memory violation error.

Running in debug mode, it stops at an assert in MultiButton.cpp, line 512 :

```
MultiButton::SubButton& MultiButton::MainButton()
{
    for(int i = 0; i < button.GetCount(); i++)
        if(button[i].main)
            return button[i];
    NEVER();                <== HERE
    return button[0];
}
```

Removing the assert (just for test) it gives assertion failed in Core/Vcont.h, line 17.

The bug appears with each optimization level, so it shouldn't be compiler related.

Ciao

Max

Am getting same thing, same code but on line 531
(using latest debian package)

Occurs when trying to add a value to a DropList
am using DropLists elsewhere in my program and
they work fine, but just not in this case

[edit]

I found that when I use 'dl.Reset' the error occurs

A work-around is to use the two calls:

```
dl.Clear();
```

```
dl.ClearList();
```

in its place - then all works as it should.
