In Uvs2 -- Revision 2543

File 'BiCont.h' still contains a bug; line 39, which is :

```
void     DropHead(int n)        { while(n-- > 0) DropHeap(); }
```

should be :

```
void     DropHead(int n)        { while(n-- > 0) DropHead(); }
```

(note the ending letter, DropHead() instead DropHeap())

File 'Valgrind.cpp' uses a wrong (or not compatible with default ubuntu Valgrind version) flag calling valgrind executable.
The line 20, which is :

```
cmdline << "valgrind --xml=yes --num-callers=40 --log-file-exactly=" << fn << ' ';
```

Should be :

```
cmdline << "valgrind --xml=yes --num-callers=40 --log-file=" << fn << ' ';
```

I've added copying of bazaar stuffs in user path plus creation of new MyApps-Bazaar assembly, to test instable/contributed stuffs.
I'll attach here the needed patches.

Ciao

Max

p.s.: SVN still contains all that stuffs!

Max

Should be :

```
 cmdline << "valgrind --xml=yes --num-callers=40 --log-file=" << fn << ' ';
```

Ops. This will not work with my copy of valgrind. "--log-file" produces non-fixed filenames there... (valgrind appends process number to extension - that is why it has -exactly option....)

Uhmmm... that's weird. From where did you download valgrind ? I've got the latest ubuntu package and it doesn't have "exactly" stuff.
BTW, I think I can patch valgrind.cpp to check wether the option is available or not.... should I ?

Ubuntu 7.10 32 bit, Synaptics, Search "Valgrind"...
