Hi!

I found, that MenuItems display ShortCuts without that "+" sign:

"CtrlC" should be "Ctrl+C"

I've just tested this in Thelde and my own apps and it seems to work. Could you provide a test case please?

Hi James!

Thanks for reply!

>>> I've just tested this in Thelde and my own apps and it seems to work. Could you provide a test case please?

Test case:

In examples > Menu add in Main "SetLanguage" line:

=====

GUI\_APP\_MAIN

{

>>> SetLanguage(LNGC\_('D', 'E', 'D', 'E', CHARSET\_UTF8));

App().Run();

}

=====

So i think, it depends on CHARSET i set with this line - something seems to go wrong on translating the shortcuts to different language.

Well, I think this was only with "Strg", right?

It had very simple reason - missing '+' in CtrlCore.t
