Hello,

in a column of a gridctrl I've an option button set by

```
arr.AddColumn("Status", t_("Sel."), 4).Ctrls(Avail3);
```

where

```
void Avail3(One<Ctrl>& ctrl)
{
    ctrl.Create<Option>();
}
```

Everythings work but when I scroll the vertical bar the option button shift to the left (see picture).

Is it normal? Perhaps I am using the ctrl in the wrong way.  
(2008.1beta2 + mingw)

Thanks,  
Luigi

add CtrlAlignHorzCenter() after Ctrl(). You can also use shortcut for creating option column:

```
grid.AddColumn(CHECK, "Yes/No").Option();
```
