Hello

File: ImageBlit.cpp

Functions:

```
int Premultiply(RGBA *t, const RGBA *s, int len)
```

```
int Unmultiply(RGBA *t, const RGBA *s, int len)
```

Should this

```
if(s->a != 0 || s->a != 255)
```

not be this

```
if(s->a != 0 && s->a != 255)
```
