hi all

this is the .h file

```
#ifndef _CISNotifier_CISNotifier_h
#define _CISNotifier_CISNotifier_h

#include <CtrlLib/CtrlLib.h>
#include <Web/Web.h>
using namespace Upp;

#define LAYOUTFILE <CISNotifier/CISNotifier.lay>
#include <CtrlCore/lay.h>

struct message
{
 String title;
 String body;
 String popup;
 String link;
 String attachment;
};
class news
{
 public:
 Time Message_Time;
 message Current_Message;
 String sender;

 news(XmlNode data)
 {

  Message_Time.day = StrInt(data["timing"]["date"]["day"][0].GetText());
  Message_Time.month = StrInt(data["timing"]["date"]["month"][0].GetText());
  Message_Time.year = StrInt(data["timing"]["date"]["year"][0].GetText());
  Message_Time.hour = StrInt(data["timing"]["time"]["hour"][0].GetText());
  Message_Time.minute = StrInt(data["timing"]["time"]["minute"][0].GetText());

  Current_Message.title = data["message"]["title"][0].GetText();
  Current_Message.body = data["message"]["body"][0].GetText();
  Current_Message.popup = data["message"]["popup"][0].GetText();
  Current_Message.link = data["message"]["link"][0].GetText();
  Current_Message.attachment = data["message"]["attachment"][0].GetText();
```

```
  sender = data["sender"][0].GetText();
 }
 message GetMessage()
 {
  return Current_Message;
 }
 String GetSender()
 {
  return sender;
 }

};

class CISNotifier : public WithCISNotifierLayout<TopWindow> {
public:
 typedef CISNotifier CLASSNAME;
 CISNotifier();
 void get();
};

#endif
```

and this is the .cpp file

```
#include "CISNotifier.h"

CISNotifier::CISNotifier() //project constructer
{
 CtrlLayout(*this, "Window title");

 HttpClient client;
 client.URL("http://cisclub.com/tecno/bta3/XML.xml");
 String content;
 content = client.ExecuteRedirect();
 XmlNode z = ParseXML(content);
 news newz(z["root"]["new"]);

 static_text.SetText(news.sender);
}
GUI_APP_MAIN
{
 CISNotifier().Run();
}
```

i dont know why this error comes
C:\MyApps\CISNotifier\main.cpp(16) : error C2664: 'news::news(Upp::XmlNode)' : cannot convert parameter 1 from 'const Upp::XmlNode' to 'Upp::XmlNode'

thanks ..... i fixed it ..... just use () instead of [] or put const in the constructor arguments
