Is there any reason why .debs are not on sf.net?

Should I just copy them from the website?

Mirek

We released debs for testing purpose like you wanted and because until now nothing went wrong we should upload them to sf.net.

Other reason why not... Should this be part of the release?
... and also the naming convention.

Well, I think that we should release this in any case.

There will always be issues to fix...
