hello all

i am not sure if this was a bug or not

i think this is a bugmmmmmm i dont know

in httpcli.cpp this is written

```
if ( body.GetLength() + part.GetLength() > DEFAULT_MAX_CONTENT_SIZE )
{
error = NFormat ( t_ ( "Maximum content size exceeded: %d" ), body.GetLength() +
part.GetLength() );
return tc_chunked ? chunked : body;
}
```

but i think it must be like that

```
if ( body.GetLength() + part.GetLength() > max_content_size )
{
error = NFormat ( t_ ( "Maximum content size exceeded: %d" ), body.GetLength() +
part.GetLength() );
return tc_chunked ? chunked : body;
}
```

so that when i change the value of max_content_size with MaxContentSize(int m) function and make error handling work with it
