Subject: Should we insert "Christmas release" ?

Hi,

original plan was to have next big release to be 602 or 603 - that one should contain "chameleon", client side draw (if that one proves to be a good idea) and other big things.

However, it seems like there is a big batch of small bug-fixes, improvements etc. in my ToDo list. Therefore we perhaps should delay "big things" and insert one "consolidation" release to empty ToDo list, moving "big" release to 603-604.

What do you think?

Mirek

```
Should there be 512 release with bugfixes(total votes:
6)
```

Yes 6/(100%)
No 0/(0%)

Bugs free version is more important than new technology. My bug no.1 now is not resizeable dhctrl control (base for glctrl and my dxctrl).

I agree, anyway new technology might resolve some problems with little effort as well (scrolling Ctrls ....)

might resolve some problems with little effort as well (scrolling Ctrls ....)

Of course it might Personally I would like to see chameleon ASAP, but since there are more and more new users of upp it is better to have as stable and as bug free version as possible first.
