as title.

I can set the font face of menubar, like "File", "Edit", "About", but the problem is in the submenu,
like File->"Open", File->"Save", File->"Close", Edit->"Cut", these font still the same. I have search
for the form, but don't get any idea how solve this problem.

For example, in the following image,
When I set the font as Courier New,
the font of "File", "Edit" and "About" is changed, but the submenu
File->"Open", File->"Close" and File->"Save" didn't change.

this is another example. as the following image.

other submenu didn't change at all.

Have you tried using Chameleon Styles?

Use this:

MenuBar::Style& style = MenuBar::StyleDefault().Write();

Using the members from style you can alter the global look of your menu. It works for any control.

BTW, let me know if you encounter any problems with those characters in menus. I'm trying to iron out all the issues with CJK characters.
