hello all

when i put this code in a window constructer

```
SQL*Select(UPLOADED_FILE_ID,UPLOADED_FILE_NAME).From(UPLOADED_FILES);

 while(SQL.Fetch())
 {
  list_files.Add(SQL[0],SQL[1]);
 }
```

the program crash and shows the error message with send report to microsoft or don't send

but when i putted this code in a afunction that is callbacked when i click a button the program works well also when i click the button and callback the function the program continue normally
