Hello all

Trying to compile the AllFor18n I have got an error. To know the reason I also tried to compile the SQL_MySql basic sample and I have got the same compiling error:

```
C:\upp\uppsrc\MySql\MySql.h(44) : error C2143: syntax error : missing ';' before '*'
```

Next is the code in MySql.h:

```
class MySqlSession : public SqlSession {
public:
    virtual bool      IsOpen() const;
    virtual RunScript  GetRunScript() const      { return &MySqlPerformScript; }
    virtual Vector<String> EnumUsers();
    virtual Vector<String> EnumDatabases();
    virtual Vector<String> EnumTables(String database);
```

```
protected:
```

```
    virtual SqlConnection *CreateConnection();
```

```
private:
```

```
    MYSQL *mysql; <!-- Here is the error(line 44)
```

It seems like MYSQL symbol is not right.

Best regards

Koldo

you have to install MySql development files (headers and libraries) from MySql.

Hello zsolt

Thank you for your answer. I have installed MySql and tried to compile the sample again but I get

errors.

As my only reason for compiling the sample was to compile the AllFor18n project and as it is not necessary to do it to translate Upp... so that's all for now. Thank you again.

Best regards

Koldo
