Subject: Not possible to get .t files

Hello all

I have compiled and run successfully AllForI18n in Linux and after exporting the .tr file, this appears empty only with:

LANGUAGE "ES-ES UTF-8";

and I get in the lower side a window with:

/home/upp/uppsrc/CtrlLib/CtrlLib.t(20): invalid language
/home/upp/uppsrc/Web/Web.t(22): invalid language
/home/upp/uppsrc/RichEdit/RichEdit.t(20): invalid language
/home/upp/uppsrc/GridCtrl/GridCtrl.t(13): invalid language
/home/upp/uppsrc/Oracle/Oracle.t(16): invalid language
/home/upp/uppsrc/CtrlCore/CtrlCore.t(14): invalid language
/home/upp/uppsrc/Core/Core.t(20): invalid language

when I double click over the lines it sends me to the messages in Taiwanese. For example, in CtrlLib.t:

T_("(default)")

deDE("(Voreinstellung)")
esES("(por defecto)")
fiFI("(oletus)")
frFR("")

itIT("(predefinito)")

roRO("(implicit)")
ruRU("")
srSP("")

the "/home/upp/uppsrc/CtrlLib/CtrlLib.t(20): invalid language" error moves the cursor over the line

It is the same in the rest of .t files.

Do you know what to do?

Best regards

Koldo

Have you read this?

http://www.ultimatepp.org/srcdoc$Core$Translating$en-us.html

You are not supposed to compiler/run AllFori18n... Just export the .tr file, then translate and post here.

BTW, I have just tried and got exactly what is expected ("ES-ES.UTF-8.tr" file).

Mirek

P.S.: zhTW was added only recently; if you are working with svn sources (you should!), you might need to recompile theide first so that it recognizes zhTW...

Hello luzr

Perfect, you were right.

I have used the ide from the last svn and I have got the ES-ES.UTF-8 file perfectly. And yes, I did not have to compile the project!.

Best regards
Koldo
