Remember Java advertise? Well i discovered that "everywhere" apply also to U++. Today I was remember about ReactOS project and i was thinking to try U++ on it. Well, seems U++ can run also on ReactOS. Shouldn't we add ReactOS as a "supported" platform on which Upp run ?(Joke)
I'm attaching two screenshots with UWord running on ReactOS which was running on QEmu which was running in Vista which was running on... my notebook.

It didn't look so good but definitely it looks better than how Firefox was looking on ReactOS
