hi to all,

I cannot find any class for parsing C++. The XMLParser is not supposed to do so, and the CParser ist only for arithmetic expressions, if I see that right.

Which one did you take for the code completion e.g.?

kind greets
Martin

CParser is basically lexical analyzer.

C++ parser of theide is in CppBase ("C++ database"). Beware, you should not consider its interfaces stable.

Mirek

Hi Mirek,

Thanks for the hint, I'll have a look.

Martin
