Subject: Alt+J on #include line goes to header file
Posted by mirek on Fri, 19 Sep 2008 08:09:50 GMT

The pseudoproblem:

The title of menu item: "Go to symbol definition" was no longer correct, because it will go to things based on context - I am also considering #ifdef / #endif jumps etc...

For now, I have renamed it to "Context go to", but I do not like it too much... Any suggestions are welcome.
