Subject: String == optimization hint...

BTW, due to nature of new String implementation:

```
void Foo()
{
    String s = ...
    if(s == "myfoo") ...
}
```

is much faster written as

```
static String s_myfoo("myfoo");

void Foo()
{
    String s = ...
    if(s == s_myfoo) ...
}
```
