Hi, is there any way of hiding a column without it to appear in GridCtrl menu (left-click), so the user doesn't have to know about it? I'm using GridCtrl with Hiding(). Hidden() applied to a column do that hiding it initially but not from menu.

Regards, Andrei.

Yes, use AddIndex instead of AddColumn.

```
grid.AddIndex(ID)
grid.AddIndex(HIDDEN_NAME);
grid.AddColumn(PUBLIC_NAME); // only this column will be available in popup menu
```
