Subject: netscape colors as COLORREF
Posted by amando1957 on Sun, 28 Sep 2008 20:02:09 GMT

Hello folks,

I consider the 120 Netscape colors pretty fine, so I've copied them from the HTML-help, and written a tiny code-generator, which converts them to Win32 COLORREF's.

I'm not sure how they can get integrated to the Core, but they are useful for a Win32-project at least.
And here they are:
