Is there a way to automatically generate .h and .cpp files for the selected layout, e.g.
1) create a layout
2) click to produce .h file with class definition like "class MyCls : public WithMyLayout<ParentCtrl>". and a .cpp file with implementation of the constructor with "CtrlLayout(*this);" ?

Hi, just read Upp Manual especially here(scroll down to "Layout code generation").

thanks! just read and forgot -)
a good candidate to place into the FAQ.
