In svn 512 CtrlCore/X11Wnd.cpp, i don't know why these signs are in code...

```
   }
<<<<<<< .mine
  //if(GLX) return;
=======
//  if(GLX) return;
>>>>>>> .r509
  GC gc = XCreateGC(Xdisplay, (Drawable)top->window, 0, 0);
```

Errors:

/home/can/Projects/UppRepo/trunk/uppsrc/CtrlCore/X11Wnd.cpp:71: error: expected

/home/can/Projects/UppRepo/trunk/uppsrc/CtrlCore/X11Wnd.cpp:71: error: expected

in this scope

also

/home/can/Projects/UppRepo/trunk/uppsrc/CtrlCore/CtrlDraw.cpp:50:2: error: #endif without #if

In my programs sources there is a label with the message "Handle with care"

@bytefield:

it seems you applied the patch I submitted a few days ago. Mirek did its own (slightly different) correction, and since the same lines are involved, it causes svn conflicts.The best for you is to delete the faulty files X11Wnd.cpp and CtrlDraw.cpp and do a 'svn up' again.

Hi captainc,

I got the same error. Casting the anonymous enum to int seems to solve the problem.
