Subject: Ide + docking package
Posted by unodgs on Wed, 15 Oct 2008 20:36:30 GMT

Just wanted to inform you that together with James (mrjt) we've started work on adding docking package to the ide. I merged mrjt changes done to nv branch with the trunk (localy for now). The current progress so far presents a screenshot below. There is of course a lot of work to do - like saving/loading layouts, additional menu that allows to switch on/off any window, editor tabbar integration - but it should be done in reasonable time

Nice work!
This is in svn now?

I have it integrated. As soon as I finish modifing the ide I'll move it from bazaar to uppsrc.
