hello,

after installation of the mysql-devel package, I still get an error when compiling the SQL_MySql program

```
/usr/bin/ld: cannot find -lmysqlclient_r
```

There were errors. (0:00.50)

what does this mean ?

regards from Belgium

Jean-Paul

You don't have the reentrant (multi-threaded/mt) version of mysql client libraries installed.

Thank you for answer M. zsolt

for me, it seems that the lib are correctly installed

in /usr/lib/mysql I can find

```
libmysqlclient_r.a
```

```
libmysqlclient_r.so
```

```
libmysqlclient.a
```

```
libmysqlclient.so
```

but maybe upp don't know that place ?

regards

JP

Hello,

Now it works !

I just made a copy of the .so files from the /usr/lib/mysql to /usr/lib

thanks

JP
