---

I write the little program "Chinese Chess " by U++ and some SDL library.

This program is revised from the following article, I would like to thank forlano.

<http://www.ultimatepp.org/forum/index.php?t=msg&th=3019&start=0&>

The program is including only the graphic interface part, I do not have time to write the best part, e.g. chess artificial intelligence.

You can distribute or modify this program(including source code) for any purpose without my permission.

Just feel free to use it.

Thanks to Ultimate++.

I have amend some errors, to remove unnecessary libs and update execute file and source code.

Execute File(Updated):

<http://www.mediafire.com/?cvwnn3mzx3d>

Source Code(Updated):

<http://www.mediafire.com/?iyyymckdthfz>

Some part(icon or image) of this program is get from Internet directly.

If the program violated your copyright, please let me know and I will as soon as possible to remove the file.

My E-mail is:

[odyssey@ms69.url.com.tw](mailto:odyssey@ms69.url.com.tw)
