Hi everybody,

I faced some problems to compile mysql and oleDB (of course need a MSC) with MingW so I decided to move to VC++8.0 compiler. I built the paths for compiler and SDK 6.0A bin/include and lib files but I got systematically the following error:

such file or directory
CtrlLib: 51 file(s) built in (0:00.14), 2 msecs / file, duration = 203 msecs, parallelization 82%

There were errors. (0:00.21)"

I searched for typeinfo.h in include directory of the Win SDK 6.0A but did not find it.

Somebody could help me ?

thanks in advance

kind regards
Biobytes
