Hi!

How can I enable the 'PDF Export' button in the Report example? I can see that button in Report.lay, but couldn't figure out how to activate it.

I want to have to option to save as PDF instead of output to printer.

Thanks for any tips.

To activate pdf export functionality you need to add PdfDraw package directly to the main package - Reports.

To achieve it: right click on the Reports package -> choose "Add package to 'Reports'" -> find the PdfDraw package -> click OK -> compile.

This includes PdfReport.icpp file which implements pdf drawing function that activates pdf export button.
