I'm trying to use TreeCtrl with RichTextCtrl as nodes.
Unfortunately, I've met the problem with calling method Clear() and populating a tree with new nodes.

Old RichTextCtrl widgets are kept displayed instead of getting cleared.

Is this a normal behavior or a bug?

TIA

Fixed and synced.

IMO, the reason it escaped the attention so far is that you usually "Clear" the Array containing widgets with TreeCtrl::Clear at the same time.

BTW, I was thinking about your "cursor problem" (correct background/foreground color of RichTextCtrl).

I think you should be able to use focus to find out how the widget should be displayed. Widgets with TreeCtrl cursor have focus...
