Also if it's not too much please specify the O.S.(s) and the compiler(s).

Upp version i use(total votes: 17)

Stable 1/(6%)

From svnbuilds 4/(24%)

Stable and svnbuilds 5/(29%)

I build and use my own 7/(41%)

Solaris
HP-UX
....

Excellent. We now sort of plan creating single src based posix distro - you will be able to test

cocob

Is there any widely used compiler other than GCC?

Anyway, seriously, I guess we will start with GCC, but I believe we can eventually gradually add support of other compilers.

IMO, if you have working Makefile, you can use bash script, awk and sed and change it to work with other compiler.
