I Have this error:

Quote:

Exception: C0000005 at 00478D9A
EXCEPTION_ACCESS_VIOLATION
reading at 00000036

after when I use Function PromptOKCancel on win32 compiled with MSC8 DEBUG.
I thing that the error is in:

```
int Prompt(Callback1<const String&> WhenLink,
           const char *title, const Image& iconbmp, const char *qtf, bool okcancel,
           const char *button1, const char *button2, const char *button3,
           int cx,
           Image im1, Image im2, Image im3)
...
Vector<Ctrl *> wins = Ctrl::GetTopWindows();
for(int i = 0; i < wins.GetCount(); i++) {
    TopWindow *w = dynamic_cast<TopWindow *>(wins[i]);
    !!!! if(w->GetScreenRect().Intersects(dlg.GetScreenRect()) && w->IsTopMost()) {
        dlg.TopMost();
        break;
    }
}
```

because it cannot "w->GetScreenRect()"... may be the property "Rect16 rect;" of class Ctrl(object w) is not initialized because it used "TopWindow *w = dynamic_cast<TopWindow *>(wins[i]);"?

I attached the package where i get this error!

try to close application and error is prompt!

Help please!

I tested to compile and run on ubuntu 8.10. this error I have not!
Error is only on win32 (windows xp).

Intersting. The problem is that GetTopWindows doesn't filter out your TrayIcon, so the dynamic_cast fails and returns NULL.

TrayIcon is unique in that it is the only Ctrl that I know of that has a top-level window but is neither a TopWindow or a PopUp.

Fixed:

```
TopWindow *w = dynamic_cast<TopWindow *>(wins[i]);
if(w && w->GetScreenRect().Intersects(dlg.GetScreenRect()) && w->IsTopMost()) {
    dlg.TopMost();
    break;
}
```

Mirek
