Hi all,

It is possible to assign the focus to the yes button of the PromptYesNo prebuild dlg? The aim is to avoid use the mouse. Using the keyboard is faster

Thanks a lot

Alex

It's not possible without changing the Prompt source, but you can use the Y/N keys to press the buttons. I think the intention is that PromptYesNo should not have a default answer, since it is entirely dependent on context.

Ok, thank you!
I will change the source.

Is there any ready to use dlg box that reads some text from user?
(with an edit box)

Alex

Yes, the EditText functions do this.
