Linux x86_64 Ubuntu 7.10
Application: HomeBudget

Conditional jump or move depends on uninitialised value(s)

uppsrc/Sql/SqlCase.cpp:177
uppsrc/Sql/SqlVal.cpp:85

Subject: Re: Conditional jump or move depends on uninitialised value(s)

Application: HomeBudget

Conditional jump or move depends on uninitialised value(s)

uppsrc/Sql/SqlCase.cpp:177
uppsrc/Sql/SqlVal.cpp:85

Is this compiler error or valgrind?

Mirek

Conditional jump or move depends on uninitialised value(s)

uppsrc/Sql/SqlCase.cpp:177
uppsrc/Sql/SqlVal.cpp:85

Is this compiler error or valgrind?

Mirek

Well, I have checked both - no problems there. Also, looking at the code, it is unlikely.

(OTOH, valgrind detected a couple of uninitialized variables elsewhere, now fixed

Thinking about it, it is still possible that you have performed some kind of operation that I did not.... I have just tested adding some simple records to HomeBudget, nothing else...

Thanks. All SQL-related issues with valgrind in my application are fixed now. I'll try to do more testing.
