Subject: GUI MT project does not compile

I tried to do my first "GUI MT" project. And I can not compile it.
My own code has only creation of TopWindow. And already I see several very suspicious errors:
In file included from C:\upp\uppsrc\Core\heapdbg.cpp:7:
C:\upp\uppsrc\Core\HeapImp.h:164: error: thread-local storage not supported for this target
C:\upp\uppsrc\Core\Random.cpp:152: warning: ignoring #pragma comment
In file included from C:/upp/out/Core/MINGW.Blitz.Gui.Mt\$blitz.cpp:54:
C:\upp\uppsrc\Core\Random.cpp:175: error: thread-local storage not supported for this target
C:\upp\uppsrc\Core\Random.cpp:176: error: thread-local storage not supported for this target
Any suggestions?

Yes, please give U++ version and compiler used so we can try the same version.

But if you're using SVN version, try a different revision number. I wasn't able to build some new
SVN versions and had to revert to older ones.

I just did the svn update.
Opened Tutorial/Gui01.
Switched package configuration mode from GUI to GUI MT and get the same errors.

I am not sure how to tell version of U++ (svn update was done February 5, 2009. is it enough?)
I am compiling with MinGW on WinXP.
`g++ --version` reports: g++.EXE (GCC) 3.4.5 (mingw-vista special r3)

You cannot do MT in mingw.

Mirek

Hi,

you can do MT with MingW, but you need a more recent version.
I have 4.3.0 installed and it works, but 3.x is too old.

Regards,
Matthias
