...how ?

How to display custom message on status bar while user is editing ?

EditString ctrl
ctrl.Left...ht).HelpLine(cHelp));

Tried Description, Tip, etc...none work. any1 knows how to do it ?

Thanks.

There is no implicit logic that would move "Tip" or any other to statusbar when EditField has focus.

OTOH, it should be quite simple - overload ChildGotFocus/ChildLostFocus, read the help from focused widget and push it to status line.

Mirek

hi,
that worked, thanks.
